

NHLANHLA LUCKY SHIRILELE

Midrand, Gauteng, South Africa

Cell: 0710059058

Email: shirilelenl94@gmail.com

PROFESSIONAL PROFILE

Professional Electrical and Electronic Engineer with over four years of experience in engineering operations, technical support, systems integration, fault diagnosis, infrastructure management, and project coordination within critical telecommunications and infrastructure environments. Holds a Bachelor of Engineering Honours Degree in Electrical and Electronic Engineering, complemented by studies in Business Management and Project Management.

Experienced in resolving complex technical problems, conducting root cause analysis, managing engineering-related projects, performing technical evaluations, and producing technical reports that support operational excellence. Possesses strong analytical, leadership, and communication skills with a commitment to safety, continuous improvement, engineering integrity, and professional excellence.

Seeking to contribute engineering expertise, technical leadership, and problem-solving capabilities to Eskom Generation as a Senior Engineer Professional Engineering.

EDUCATION

Bachelor of Engineering Honours (Electrical and Electronic Engineering)

University of Johannesburg

Relevant Areas of Study

- Electrical Engineering
 - Electronics Engineering
 - Power Systems
 - Control Systems
 - Engineering Mathematics
 - Communication Systems
 - Engineering Design
 - Systems Engineering
-

Higher Certificate in Business Management (Project Management)

University of Johannesburg

Modules Completed

- Business Writing and Communication
 - Business Decision Making
 - Project Management
 - Procurement Management
 - Risk Management
 - Communication Management
 - Business Administration
 - Leadership and Management Principles
-

PROFESSIONAL EXPERIENCE

Operations Specialist / Engineering Operations

Openserve

Permanent Employment

Key Responsibilities

- Investigate and resolve complex engineering and technical incidents.
- Conduct root cause analysis and fault diagnostics.
- Perform technical evaluations and recommend engineering solutions.
- Support engineering projects, infrastructure upgrades, and network modernization initiatives.
- Analyse system performance and identify opportunities for optimization.
- Coordinate implementation activities with multidisciplinary teams.
- Ensure compliance with engineering standards, procedures, and policies.
- Produce technical reports, engineering documentation, and operational assessments.
- Support lifecycle management of engineering assets and infrastructure.
- Participate in risk assessments and mitigation planning.
- Assist with planning, implementation, and monitoring of engineering initiatives.

Key Achievements

- Successfully coordinated multiple infrastructure implementation projects.
- Improved operational efficiency through technical troubleshooting and process optimization.
- Reduced service-impacting incidents through proactive fault management.
- Supported successful delivery of strategic engineering and operational projects.

- Developed expertise in technical investigations and infrastructure planning.
-

ENGINEERING PROJECT EXPERIENCE

Broadband Access Technology and Network Integration Project

- Conducted engineering investigations and technical analysis.
 - Evaluated system performance and reliability.
 - Assisted with planning and implementation of infrastructure integration activities.
 - Produced technical reports and project documentation.
 - Collaborated with multidisciplinary engineering teams.
-

Infrastructure Reliability Improvement Initiative

- Conducted engineering analysis on operational performance trends.
 - Identified recurring technical issues and recommended corrective actions.
 - Supported implementation of reliability improvement strategies.
 - Contributed to operational efficiency and service quality improvements.
-

TECHNICAL COMPETENCIES

Engineering

- Engineering Problem Solving
- Root Cause Analysis
- Reliability Engineering
- Asset Lifecycle Management
- Engineering Design Principles
- Technical Evaluations
- Risk Assessment
- Preventive Maintenance
- Condition Monitoring
- Failure Analysis
- Continuous Improvement
- Technical Investigations

Project Management

- Project Planning
- Project Coordination
- Stakeholder Management
- Resource Planning
- Procurement Management
- Risk Management
- Change Management
- Cost Analysis
- Performance Monitoring

Technical Skills

- Microsoft Excel (Advanced)
 - Microsoft Office Suite
 - Microsoft Project
 - Data Analysis
 - Technical Reporting
-

LEADERSHIP EXPERIENCE

- Coordinated multidisciplinary teams during project implementation.
 - Assisted with mentoring and supporting junior staff members.
 - Facilitated technical knowledge sharing among colleagues.
 - Worked closely with stakeholders to ensure successful project delivery.
 - Demonstrated leadership during fault resolution and operational support activities.
-

ENGINEERING KNOWLEDGE

- Engineering Theory and Principles
- Power Systems Fundamentals
- Engineering Standards and Codes
- Asset Management Principles
- Technical and Financial Evaluation
- Quality Management Systems

- Occupational Health and Safety Requirements
- Engineering Policies and Procedures
